

Garden Plant List

2538 Northeast 92nd Street

This lovingly nurtured garden has been tended organically for seventeen years!

It's been planted with a variety of shrubs, trees, perennials, herbs and ground covers providing food for humans, birds and beneficial insects. The plantings are mostly drought tolerant and create changing views and beautiful outlooks year round.

The hardscape includes brick and stone paths, a grape arbor framing a wooden swing, level, open lawn areas, raised beds for annual vegetable growing and a deck for lounging and alfresco dining.
